MiniSafe2

NEW

The MiniSafe2 is the smallest, universally applicable controller from ELTAKO. The central control unit ensures that EnOcean compatible sensors and actuators can be conveniently and centrally controlled using the GFA5 app and voice commands.
This allows light, shading, air conditioning, security components, and much more to be easily and fl exibly combined with one another in order to transform any living environment into a professional smart home in no time at all.
The basic equipment includes app-based automation, update and backup options. Migration from older ELTAKO controllers is possible.
The MiniSafe2 can basically be operated offi ne and locally, internet access is not required for this. Remote access and the cloud connection can optionally be activated during operation.
An internet connection and a WiFi network are required for setup.
